

On-site Training

Oxy-Fuel Gas User & Practical Cutting

2018 Proposal

T:01606 872864 E:admin@PGStraining.com

Training Requirement

Personnel operating oxy-fuel gases & equipment require training in their safe use and management to comply with current Codes of Practice & Legislation and to meet the obligations of both employees & employers in respect of the H & S at Work Act 1974 & PUWER.

Training Objective & Content

Comprehensive training leading to the award of an Oxy-fuel Gases Safety Passport Card demonstrating the learner has been provided with, and has understood, the safety requirements for the safe use of oxy-acetylene/propane gases and equipment.

Classroom Session 3 hours

Interactive training on oxy-fuel gases and equipment with topics including:

Operator behaviours, gas properties & hazards, cylinder identification & data, gas equipment, emergency procedures, cylinder storage, handling & transport, PPE, Legislation & Codes of Practice.

Practical Session 3.5 hour

All delegates will be shown practical cutting techniques & will have the opportunity to practice.

Delegates will also be given the opportunity to undertake, PPE selection and use, regulator fitting & manual handling of cylinders, correct assembly checks, before use checks, nozzle selection, purging, safe light up and flame setting, practical cutting practice and techniques, safe shutdown and equipment stowage, emergency shutdown procedures.

Certification & CPD hours

Successful learners will receive a documented Certificate of Achievement with 4.5 CPD hours & the credit card style PGS Gas Safety Passport.

This course is also available as a QCF Level 3 qualification.

Please contact PGS if you would like to discuss our different levels of certification.
